Notes to Interim Consolidated Financial Statements

Three and six months ended January 31, 2009 and 2008

(Unaudited – prepared by management)

**1. Nature of operations and going concern**

ValGold Resources Ltd. (“the Company”) is incorporated under the British Columbia Business Corporations Act. The Company is presently engaged in the business of exploration and development of mineral properties in Canada and Venezuela, and has not yet determined whether its mineral property interests contain mineral reserves that are economically recoverable.

The accompanying consolidated financial statements have been prepared using Canadian generally accepted accounting principles applicable to a going concern. Several adverse conditions as set out below cast significant doubt on the validity of this assumption. At January 31, 2009, the Company has no source of operating cash flow and an accumulated deficit of \$45,207,254 (July 31, 2008 - \$44,505,556). At January 31, 2009, the Company has a working capital deficiency of \$2,082,443 (July 31, 2008 - \$1,188,894). Operations for the six months ended January 31, 2009, have been funded primarily from an increase in advances from related parties and from cash and cash equivalents on hand at July 31, 2008.

The Company's ability to continue as a going concern is contingent on its ability to obtain additional financing. The Company has entered into an option agreement on its Tower Mountain property (Note 4 (c)). The current financial equity market conditions, the challenging funding environment and the low price of the Company's common shares make it difficult to raise funds by private placements of shares. The junior resource industry has been severely impacted by the world economic situation, as it is considered to be a high-risk investment. There is no assurance that the Company will be successful with any financing ventures. It is dependent upon the continuing financial support of shareholders and obtaining financing to continue exploration of its mineral property interests. While the Company is expending its best efforts to achieve its plans by examining various financing alternatives including reorganizations, mergers, sales of assets, and settlement of debts by share issuances, or other form of equity financing, there is no assurance that any such activity will generate funds that will be available for operations.

The interim consolidated financial statements do not include any adjustments to the recoverability and classification of recorded assets, or the amounts of, and classification of liabilities that would be necessary if the going concern assumption were not appropriate. Such adjustments could be material.

The amounts shown as mineral properties and related deferred costs represent costs net of recoveries to date, less amounts written off, and do not necessarily represent present or future values. Recoverability of the amounts shown for mineral properties is dependent upon the discovery of economically recoverable mineral reserves, securing and maintaining title and beneficial interest in the properties, the ability of the Company to obtain financing necessary to complete the exploration and development of its mineral property interests, and on future profitable production or proceeds from the disposition of the mineral property interests. The Company's mineral property interests at January 31, 2009, are in good standing.

**The Company's independent auditor has not performed a review of these interim consolidated financial statements.**

Notes to Interim Consolidated Financial Statements

Three and six months ended January 31, 2009 and 2008

(Unaudited – prepared by management)

**2. Basis of presentation:**

The accompanying financial statements for the interim periods ended January 31, 2009 and 2008, are prepared on the basis of accounting principles generally accepted in Canada and are unaudited, but in the opinion of management, reflect all adjustments (consisting of normal recurring accruals) necessary for fair presentation of the financial position, operations and changes in financial results for the interim periods presented. The financial statements for the interim periods are not necessarily indicative of the results to be expected for the full year. These interim consolidated financial statements do not contain all of the information required for annual financial statements and should be read in conjunction with the most recent annual audited consolidated financial statements for the year ended July 31, 2008.

**3. Accounting standards issued but not yet effective**

(i) Section 1535 – Capital disclosures

This standard requires disclosure of an entity's objectives, policies and processes for managing capital, quantitative data about what the entity regards as capital and whether the entity has complied with any capital requirements and, if it has not complied, the consequences of such non-compliance. This standard is effective for the Company for interim and annual periods beginning on August 1, 2008.

(ii) Financial instruments – disclosure and presentation (Section 3862 and 3863)

These standards replace CICA Handbook Section 3861, "*Financial Instruments – Disclosure and Presentation*". They expand current disclosure requirements in order to enable users of financial statements to evaluate the significance of financial instruments for an entity's financial position and performance, including disclosures relating to fair value. In addition, disclosure is required of qualitative and quantitative information regarding exposure to risks arising from financial instruments, including specified minimum disclosures of credit risk, liquidity risk and market risk. The quantitative disclosures must provide information on the extent to which the entity is exposed to risk, based on information provided internally to the entity's key management personnel. The Company expects that its financial statements disclosures will be expanded to incorporate the new additional requirements.

(iii) Amendments to Section 1400 – going concern

CICA handbook Section 1400, "*General Standards of Financial Statement Presentation*", was amended to include requirements to assess and disclose an entity's ability to continue as a going concern. The new requirements are effective for the Company's interim and annual financial statement for the fiscal years beginning on August 1, 2008.

The Company does not anticipate any material adjustments to the consolidated financial statements on adoption of the new Standards.

**The Company's independent auditor has not performed a review of these interim consolidated financial statements.**

**3. Accounting standards issued but not yet effective (continued)**

(iv) International Financial Reporting standards (“IFRS”)

In 2006, the Accounting Standards Board (AcSB) published a new strategic plan that will significantly affect financial reporting requirements for Canadian companies. The AcSB strategic plan outlines the convergence of Canadian GAAP with IFRS over an expected five-year transitional period. In February 2008, the AcSB announced that 2011 is the changeover date for publicly-listed companies to apply IFRS. The changeover is effective for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. The transition date of August 1, 2011, will require the restatement of comparative amounts reported by the Company for the year ending July 31, 2011. While the Company has begun assessing the implications of adoption of IFRS for fiscal 2012, the financial reporting impact of the transition to IFRS has not been estimated at this time.

**4. Mineral property interests**

Accumulated costs in respect of the Company's mineral property interests owned, leased and under option consist of the following:

	<b>Acquisition Costs</b>	<b>Deferred Exploration</b>	<b>January 31, 2009 Total Costs</b>

### **4. Mineral property interests (continued)**

#### **(a) Garrison Project, Ontario**

In June 2005, the Company purchased 100% interest in 35 claims located in Garrison Township, Kirkland Lake District, Larder Lake Mining Division in northern Ontario for a one-time cash payment of \$110,000.

In the six months ended January 31, 2009, the Company entered into a Letter of Intent (“LOI”) with Northern Gold Mining Inc. (“Northern Gold”) on the Garrison property. Under the terms of the LOI, Northern Gold may acquire an option to earn up to an undivided 80 % of the Company's 100% interest in the Garrison gold property. Under the proposed option agreement, Northern Gold may acquire a 50% undivided interest in the property by making cash payments of \$1,000,000 over four years, with all or part of the payments being made in Northern Gold stock at Northern Gold's option, using a 20-day value weighted average price, upon regulatory approval. To earn the 50% interest, Northern Gold must also complete work on the property in the amount of \$4,000,000 over four years, with \$500,000 being spent on the property in the first year. After earning the 50% interest, Northern Gold can then acquire an additional 30% interest by making additional cash payments of \$1,000,000 over four years (again with all or part of the payments being made in Northern Gold stock equivalent, using a 20-day value weighted average price) and completing additional work on the property in the amount of \$4,000,000 over four years. All payments and work may be made or done at the sole discretion of Northern Gold. The proposed option agreement is subject to due diligence, negotiation of final terms and conditions and regulatory approval.

#### **(b) Tower Mountain Project, Ontario**

##### Tower Mountain Property

In June 2002, the Company entered into an option agreement with two optionors to earn a 100% interest in the Tower Mountain Gold Property located in north western Ontario. The Company earned its interest by making cash payments of \$220,000 and completing \$1,000,000 in exploration expenditures on the property over a four-year period. Commencing in 2008, an annual pre-production royalty of \$25,000 in cash or shares is payable, ending on commencement of production. Subsequent to July 31, 2008, the Company issued 250,000 common shares at a price of \$0.10, as payment for the initial royalty payment. The Company also acquired a building on the property at a cost of \$25,000. The property is subject to a 2.5% NSR on production which may be reduced to 1.5% by a payment to the optionors of \$1,000,000 at any time up to the commencement of commercial production.

**4. Mineral property interests (continued)**

In the six months ended January 31, 2009, the Company entered into an agreement with HMZ Metals Inc. ("HMZ"), by which HMZ was granted an option to acquire 50% of the Company's interest in the property. Pursuant to the agreement, HMZ must issue to the Company 1,000,000 HMZ post-consolidation common shares and incur a minimum of \$2,900,000 in expenditures on or in relation to the property. Share issuances are as follows: 200,000 shares upon receipt on regulatory approval, and 160,000 shares at each of the next five anniversaries of regulatory approval; and expenditures of not less than \$350,000 to be spent on the property on or prior to the first anniversary of regulatory approval, and thereafter, no less than \$100,000 on or before each subsequent anniversary after regulatory approval. In addition, HMZ has agreed to pay the annual taxes on patented claims forming part of the property and make the annual \$25,000 pre-production royalty payment due on the property for the duration of the agreement. HMZ may, at its discretion, accelerate its option and earn its interest in and to the property by completing its obligations at any time prior to the dates set out above. Upon completing its earn-in obligations HMZ will be vested with 50% of the Company's right, title and interest in the property, and the parties may enter into a 50:50 joint venture for the further exploration and development of the property.

The deemed expenditures at the initiation of the joint venture will be the total value of all property option payments and expenditures incurred by HMZ and the Company and the deemed value of expenditures of each party at commencement of the joint venture will be 50% of that amount. Should either party elect not to participate further or be unable to participate in further exploration of the property, its interest will decrease such that at all times the interest of each party will be that percentage which is equivalent to its expenditures or its deemed expenditures expressed as a percentage of exploration costs or deemed expenditures of both parties. If either party's interest drops to or below 10%, its interest shall be converted to a 2.0% NSR provided that the other party will have the right to purchase 50% of such NSR for \$2,900,000 at any time up to the commencement of commercial production. HMZ will be entitled to be the operator of the joint venture so long as its interest remains at or greater than 50%. The agreement is subject to regulatory approval.

**(c) Venezuela Properties, Venezuela**

In January 2006, the Company entered into a memorandum of understanding with a group of three private companies under which the Company could acquire all of the shares of Honnold Corp, a British Virgin Island company that indirectly held twenty-seven exploration licenses in Bolivar State, Venezuela (the "Venezuela Properties").

The acquisition was accomplished in two phases. Initially, the Company advanced US\$500,000 cash and 5,000,000 common shares as consideration for acquiring the sole and exclusive right and option to purchase the shares of Honnold Corp. The initial shares were issued immediately following regulatory approval of the transaction. The option, as amended, was then exercisable at any time up to October 9, 2007.

To complete the exercise of the option, the Company paid the optionors an additional US\$1,500,000 in cash and issued 15,014,443 common shares, with a fair value of US\$5,000,000. The number was calculated based on a per share amount equal to US\$0.20 plus one-half of the difference between US\$0.20 and the average closing price of the Company's common shares as traded on the TSX Venture Exchange over the 90-day period prior to the exercise date, but in any event was to be not less than US\$0.20.

**4. Mineral property interests (continued)**

**(c) Venezuela Properties, Venezuela (continued)**

The optionors retain a collective 10% free carried interest in the properties until the completion of a bankable feasibility study on the properties or any portion thereof. If they elect to maintain this interest, they would be obligated to provide their share of funding as required or their 10% interest would be diluted. The optionors also retain a 2% NSR interest in the Venezuela Properties. An arm's length finder's fee was paid in two installments. The first installment of 375,000 common shares was made following regulatory approval of the agreement, and were recorded at market value on the date of issuance of \$0.29. The second installment of the finder's fee, due upon exercise of the option, was paid by the issuance of 890,073 common shares, equivalent to US\$325,000 at the time of issuance. During the year ended July 31, 2008, the Company decided not to pursue certain of the Venezuela properties, resulting in a write off of costs incurred to date of \$10,502,677. The mineral property costs of \$4,746,719 reflect the costs related to acquisition costs and the exploration and maintenance costs on the Incredible concessions.

During the twelve-month period ended January 31, 2010, the Company has no share payments or cash payments due on any of its mineral properties. The Tower Mountain payment of \$25,000 due in July 2009 is expected to be paid by HMZ, pursuant to the option agreement. Land lease or property tax payments are due on all properties held and are required to be made at different times throughout the year, and total approximately \$228,000 per year.

**(a) Authorized**

Unlimited number of common shares without par value

**(b) Issued and fully paid**

See Interim Consolidated Statements of Shareholders' Equity.

**(c) Stock options**

The Company has a stock option plan for its directors and employees to acquire common shares of the Company at a price determined by the fair market value of the shares at the date of grant. Options generally vest immediately or over a two-year period, and have a maximum term of ten years. The plan currently allows for the issue of up to 8,987,484 stock options. In addition, options may be issued under this plan in exchange for goods or services.

The following table summarizes recent changes in the number of stock options outstanding:

**7. Share capital (continued)**

The Black-Scholes option valuation model (“B-S”) was developed for use in estimating the fair value of traded options that are fully transferable and have no vesting restrictions. The Company’s stock options are not transferable and cannot be traded. The B-S model also requires an estimate of expected volatility so the Company uses historical volatility rates to arrive at an estimate. Changes in the subjective input assumptions can materially affect the fair value estimate of stock options granted. During the period, stock-based compensation of \$2,935 was capitalised to mineral property interests on the balance sheet.

**(d) Warrants**

As at January 31, 2009, the following share purchase warrants were outstanding:

Number of Warrants	Exercise Price	Expiry Date

- (a) Management, administrative, geological and other services have been provided by Quorum Management and Administrative Services Inc. (“Quorum”), formerly LMC Management Services Ltd., since August 1, 2001. Quorum is a private company held jointly by the Company and other public companies, to provide services on a full cost recovery basis to the various public entities currently sharing office space with the Company. Currently, the Company has a 25% interest in Quorum. There is no difference between the cost of \$1 and equity value. Three months of estimated working capital is required to be on deposit with Quorum under the terms of the services agreement, and at January 31, 2009, the Company did not have three months of fees advanced to Quorum, and was in arrears on its monthly payments. The contractual agreement provides for the issuance of shares in the capital of the Company to Quorum, cessation of services, or provision of security to the non-defaulting shareholders of Quorum. No determination of settlement has been finalized with the Company and the other shareholders of Quorum, pursuant to the agreement.
- (b) Directors’ fees are paid to non-executive directors on a quarterly basis and for meetings attended during the year. Directors’ fees have been accrued but not paid since December, 2007.
- (c) Glencoe Management Ltd. is a private company controlled by Andrew F.B. Milligan, Chairman of the Company. Management fees of \$18,000 (2008 - \$18,000) were paid to Glencoe Management Ltd. for the services of the Chairman. Fees of \$18,000 have been accrued but not paid at January 31, 2009.
- (d) Consulting fees of \$15,000 (2008 - \$26,000) were paid or are payable indirectly to Kent Avenue Consulting Ltd., a private company controlled by a director, Sargent H. Berner. These fees are paid through Quorum, and are also included in the balance for ‘services provided by Quorum’. Any amount owing to Kent Avenue Consulting Ltd. is owed by Quorum, and so is included in the net payable to Quorum.
- (e) Balances receivable from related parties are non-interest bearing and due on demand, except for interest on demand loans of \$24,000 received from three directors.

**8. Related party transactions and balances (continued)**

- (f) The Company's investments include shares of two companies with directors and/or management in common with the Company throughout the fiscal year. Transactions with related parties are recorded at their exchange values which are the amounts entered into and agreed by both parties.

**9. Financial instruments**

At January 31, 2009, except as noted below, the fair values of cash and cash equivalents, investments, due from (to) related parties, and accounts receivable, approximate carrying values because of the short-term nature of these instruments. The fair values of the Company's accounts payable and accrued liabilities are significantly lower than carrying value due to the Company's current financial condition.

At January 31, 2009, cash and cash equivalents were held as cash in bank accounts, primarily in Canadian banks. The company holds no temporary investments. At July 31, 2008, the Company had no temporary investments.

The Company's financial instruments comprised cash, cash equivalents, receivables, accounts payable and accrued liabilities, and amounts due from/to related parties. Unless otherwise noted, it is management's opinion that the Company is not exposed to significant interest or credit risks arising from financial instruments. The fair value of the financial instruments approximates their carrying value due to their short-term maturity or capacity of prompt liquidation. The Company is affected by changes between its reporting and foreign functional currencies. The Company monitors its foreign currency balances to mitigate these risks.

**10. Risk management**

**Currency risk**

The Company is exposed to currency risk which is the possibility that changes in exchange rates produce an unintended effect on net income and shareholders' equity when measured in other than the measurement currency of the Company. The Company holds cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities and due to / from related parties. The Company monitors exposure of invested assets to foreign exchange and limits these amounts. The Company may from time to time, experience losses resulting from fluctuations in the values of the Canadian dollar, which could adversely affect operating results. The Company has exposure to currency risk in its accounts payable in United States dollars. This has resulted in exchange losses of \$71,675 which have been recorded as in the period ending January 31, 2009.

**Interest rate risk**

The Company is exposed to interest rate risk on its cash and cash equivalents. Generally, the Company's interest income will be reduced during sustained periods of lower interest rates as higher yielding cash equivalents mature and the proceeds are invested at lower interest rates.

**The Company's independent auditor has not performed a review of these interim consolidated financial statements.**

**10. Risk management (continued)**

**Liquidity risk**

The Company is exposed to liquidity risk which is the risk that an entity will encounter difficulty in raising funds to meet cash flow commitments associated with financial instruments. The Company endeavours to manage liquidity risk by maintaining sufficient cash and short-term investment balances for settlement of its obligations. Liquidity requirements are managed based on expected cash flow to ensure there is sufficient capital in order to meet short-term obligations. At January 31, 2009, the Company does not have sufficient cash on hand to meet its current obligations. The Company will need to raise capital to continue its operations.

**Market risk and commodity price risk**

Market risk is the risk of loss arising from adverse changes in market rates and prices. The significant market risk exposure to the Company relates to commodity price risk and specifically declines in the price of gold. The Company's ability to raise capital to fund exploration or development activities is subject to risks associated with fluctuations in the market prices of gold associated with the Company's mineral property interests.

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the exploration and development of its mineral properties and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may issue new shares, issue new debt or acquire or dispose of assets.

In order to facilitate the management of its capital requirements, the Company prepares annual expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions. The annual and updated budgets are approved by the Company's Board of Directors.

**11. Supplementary cash flow information**

During the six months ended January 31, 2009 and 2008, the Company conducted non-cash investing and financing activities as follows:

	<b>2009</b>	<b>2008</b>
Shares issued related to mineral property interests and finders' fees	\$ 25,000	\$ 5,669,203
Amortization capitalized to mineral property interests	\$ 5,440	\$ 17,695
Stock-based compensation capitalized to mineral property interests, including future income tax liability	\$ 2,935	\$ 40,453
