Notes to Consolidated Financial Statements

Six months ended January 31, 2011 and 2010

(Unaudited – prepared by management)

1. Nature of operations and going concern uncertainty

ValGold Resources Ltd. (“the Company”) is incorporated under the British Columbia Business Corporations Act. The Company is presently engaged in the business of exploration and development of mineral properties in Canada and Venezuela, and has not yet determined whether its mineral property interests contain mineral reserves that are economically recoverable.

The accompanying consolidated financial statements have been prepared using Canadian generally accepted accounting principles applicable to a going concern. Several adverse conditions as set out below cast significant doubt on the validity of this assumption. At January 31, 2011, the Company has no source of operating cash flow and an accumulated deficit of \$57,181,143 (July 31, 2010 - \$57,146,786). At January 31, 2011, the Company has a working capital surplus of \$218,288 (July 31, 2010 - working capital deficiency of \$706,172). Operations for the period ended January 31, 2010, were funded primarily from the issuance of the Company's common shares, the sale of investments in marketable securities and the use of cash on hand. The Company entered into a private placement of 2,551,000 flow-through shares for total flow-through proceeds of \$765,300, of which \$66,277 has been expended to January 31, 2011. The proceeds on the issuance of flow-through shares must be expended on exploration in Canada.

The Company's ability to continue as a going concern is contingent on its ability to obtain additional financing. The current financial equity market conditions and the challenging funding environment make it difficult to raise funds by private placements of shares. It is dependent upon the continuing financial support of related parties and obtaining financing to continue exploration of its mineral property interests. While the Company is expending its best efforts to achieve its plans by examining various financing alternatives including reorganizations, mergers, sales of mineral property interests and other assets (See Notes 4 and 10), and settlement of debts by share issuances, or other form of equity financing, there is no assurance that any such activity will generate funds that will be available for operations, or on terms acceptable to the Company.

The consolidated financial statements do not include any adjustments to the recoverability and classification of recorded assets, or the amounts of, and classification of liabilities that would be necessary if the going concern assumption were not appropriate. Such adjustments could be material.

The amounts shown as mineral property interests represent acquisition costs net of recoveries to date, less amounts written off, and do not necessarily represent present or future values. Recoverability of the amounts shown for mineral property interests is dependent upon the discovery of economically recoverable mineral reserves, securing and maintaining title and beneficial interest in the properties, the ability of the Company to obtain financing necessary to complete the exploration and development of its mineral property interests, and on future profitable production or proceeds from the disposition of the mineral property interests.

2. Basis of presentation

The accompanying financial statements for the interim periods ended January 31, 2011 and 2010 are prepared on the basis of accounting principles generally accepted in Canada and are unaudited, but in the opinion of management, reflect all adjustments (consisting of normal recurring accruals) necessary for fair presentation of the financial position, operations and changes in financial results for the interim periods presented. The financial statements for the interim periods are not necessarily indicative of the results to be expected for the full year. These interim consolidated financial statements do not contain all of the information required for annual financial statements and should be read in conjunction with the most recent annual audited consolidated financial statements for the year ended July 31, 2010.

The Company's independent auditor has not performed a review of these consolidated financial statements.

In June 2005, the Company purchased 100% interest in 35 claims located in Garrison Township, Kirkland Lake District, Larder Lake Mining Division in northern Ontario for a one-time cash payment of \$110,000.

The Company received \$25,000 in cash and 2,187,500 common shares for the first payment of \$200,000. To earn the 50% interest, Northern Gold must also complete exploration work on the property in the amount of \$4,000,000 over four years, with \$500,000 being spent on the property in the first year of the agreement and not less than \$750,000 to be expended in each of the subsequent years. After earning the initial 50% interest, Northern Gold may increase its interest to 80% by making additional cash payments of \$1,000,000 over four years, with all or part of the payments being made in Northern Gold common shares at Northern Gold's option, priced using a 20-day value weighted average price and completing additional exploration work on the property in the amount of \$4,000,000 over the next four years. 8. Financial instruments

Currency risk

The Company's currency risk arises primarily with fluctuations in United States dollar and the Venezuelan bolivar. The Company has no revenue and any exposure to currency risk is related to expenditures by the Company in United States dollars or the Venezuelan bolivar, as the majority of operating expenses are payable in Canadian dollars. The currency risk by the Company relates to unpaid liabilities of the Company payable in United States dollars or Venezuelan bolivars.

The Company has not hedged its exposure to currency fluctuations. At January 31, 2010, the Company is exposed to currency risk through the following assets and liabilities denominated in United States dollars and Venezuelan bolivars, but presented in Canadian dollar equivalents. The Company uses the parallel market rates when converting its transactions and assets and liabilities in Venezuelan bolivars.

	January 31, 2011	January 31, 2010
United States dollars		
Cash and cash equivalents	24,559	14,391
Accounts payable and accrued liabilities	(340,233)	(326,147)
Venezuelan bolivars		
Cash and cash equivalents	409	1,374
Accounts payable and accrued liabilities	(326,426)	(582,886)

Based on the above net exposures at January 31, 2011, and assuming that all other variables remain constant a 10% appreciation or depreciation of the Canadian dollar against the United States dollar would result in an increase/decrease of \$31,567 (2010 - \$31,176) in the Company's loss from operations, and a 10% appreciation or depreciation of the Canadian dollar against the Venezuelan bolivar would result in an increase/decrease of \$32,602 (2010 - \$58,151) in the Company's loss from operations. The Company's exposure will primarily be due to changes in the Venezuelan bolivar, as a significant portion of its accrued liabilities are in Venezuelan bolivars.
